# Weather Key Points

Regional Operations Center

Western Region

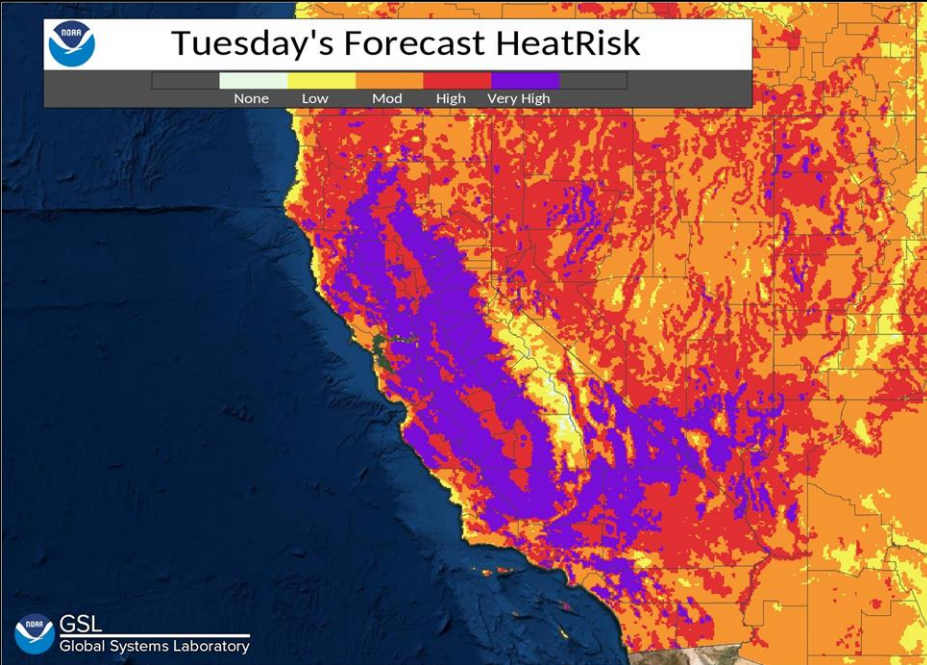

Tuesday, September 6

- Dangerous and record-setting heat will persist for much of the state through Friday, before cooler weather gradually returns for the weekend
  - Widespread high to very high heat risk impacts will occur in many areas, with daytime temperatures reaching the 80s and 90s near the coast and 100 to 115°F inland while overnight lows remain very warm in the 70s and 80s, and even near 90°F across the Imperial Valley and some of the central foothills
  - These temperatures will set records in many areas, with some locations likely to see all-time high temperature records for the month of September and possibly for any time of year
- Fire weather conditions remain highly elevated to locally critical for many areas through Friday, particularly in and around the mountains and foothills.
  - Areas of more widespread critical fire weather conditions are expected across the Modoc Plateau and the Klamath Mountains Tuesday and Wednesday as stronger winds occur
- Isolated showers and thunderstorms remain possible across the southern mountains and Sierra. Widespread rainfall is not expected, but any storms could produce locally heavy rainfall and gusty winds.
  - Thunderstorms across central and northern California mountains will be mostly dry, with lightning and gusty winds.
- The remnants of Hurricane Kay may approach southern California toward Saturday or Sunday. Note that confidence regarding the track of this storm and any impacts to California remains very low at this time.

## Key Points

- Hurricane Kay is forecast to track along or near the western coast of the Baja through Friday while also weakening back to a Tropical Storm late in the week
- The track of this tropical system remains highly uncertain as it approaches southern California by the weekend
- A more western track would bring limited impacts to the state (mainly just higher surf at the coast), while an eastern track could bring locally heavy rainfall to some areas

Continue to closely monitor forecasts this week
